2019-2024 Acura RDX A-Spec - Pair Bluetooth Phone

2019-2024 Acura RDX | Easy | 5-10 minutes | $0 DIY

TOOLS

Smartphone with Bluetooth capability
Acura RDX A-Spec vehicle with infotainment system Owner's manual

STEPS

1. **Enable Bluetooth on your phone - On your phone, open Settings -> Bluetooth and turn** Bluetooth on so the phone is discoverable. Keep the phone unlocked near the 2019-2024 Acura RDX A-Spec cabin. Close other cars' pairing prompts so you do not pair to the wrong vehicle.
2. **Open the Bluetooth/phone menu - Using the infotainment screen or voice button, open Phone** -> Connect / Pair / Add device (wording varies by trim year). Confirm the 2019-2024 Acura RDX A-Spec is in pairing mode and note the name shown (often the model name).
3. **Select the 2019-2024 Acura RDX A-Spec from the phone's Bluetooth list - On the phone,** select the 2019-2024 Acura RDX A-Spec from available devices. Accept any pairing code/prompt on both the phone and the 2019-2024 Acura RDX A-Spec screen - codes must match. Allow Phone book / Contacts and Favorites acce...
4. **Confirm connection and set as favorite - When status shows Connected on both devices,** make a test call and play Bluetooth audio. Set this phone as the priority/favorite device if multiple phones are stored.
5. **Grant permissions Android/iOS may still request - Allow notifications, nearby-device** access, and Bluetooth permissions if prompts appear after pairing. For messaging/read-aloud features, accept SMS/notification access on the phone.
6. **Troubleshoot if pairing fails - If pairing fails, forget the device on both the phone and** the RDX, reboot both, and retry with other phones' Bluetooth off. Check for an infotainment software update if the RDX repeatedly drops connections.
