2019-2024 Audi Q8 - Cabin Air Filter Replacement

2019-2024 Audi Q8 | Easy | 15-25 minutes | $20 DIY

TOOLS
Trim tool or flat screwdriver (optional)
Flashlight Gloves Vacuum or rag for debris

PARTS
Cabin air filter $20.00

STEPS

1. **Park and prep the passenger side - Park the Q8 level, ignition fully off. Slide the seat** fully rearward and kneel in the footwell with a light - it's tight, and a headlamp makes the fasteners visible.
2. **Remove the footwell trim panel - Look under the glovebox for the trim panel covering the** filter housing. Remove its fasteners - type varies by build, so check your owner's manual rather than guessing - and lower the panel out of the way.
3. **Open the filter housing - Slide or unclip the housing cover open. Take a photo now; it's** easy to flip the new one the wrong way later. Work the cover gently and evenly from both sides so the tabs don't bind.
4. **Swap in the new filter - Pull the old filter out and compare it with the new one. Heavy** dust is normal wear; a damp filter suggests the cowl drains need attention. Install the new filter with its arrow matching the old direction, seated fully flat.
5. **Reassemble - Refit the housing cover until it locks and reinstall the trim panel,** confirming nothing hangs into the footwell. Run your hand along the panel's edges to confirm it's flush; a hanging panel catches shoes and rattles over bumps.
