2017-2024 Alfa Romeo Giulia - Oil Change (2.0T)

2017-2024 Alfa Romeo Giulia | Easy | 1-2 hours | $57 DIY

TOOLS

13mm Socket Flathead Screwdriver Jack Stands Oil Filter Wrench Drain Pan Funnel Torque Wrench Rubber Gloves Safety Glasses Creeper or Mat

PARTS

Engine Oil (0W-30 Full Synthetic, ACEA C2) $40.00
Oil filter cartridge element kit (Mopar 68229406AA, with O-rings) 4892339AB $15.00
Drain Plug Washer 6505585AA $2.00

STEPS

1. **Prepare (0W-30 ACEA C2, 5.5 qt!) - You'll need: 0W-30 ACEA C2 / 9.55535-GS1 (buy 6 quarts** - you'll use 5.5), OE-grade CARTRIDGE filter, drain pan, funnel, AlfaOBD or FCA-capable scanner. Note: the Quadrifoglio (2.9L V6, 7.0L, 0W-40) is a different job - this guide is th...
2. **Remove Undertray, Drain Oil - Remove the undertray/skid guard. Position the drain pan.** Remove the drain plug. Let the old oil drain (expect ~5.5 quarts). The old 0W-30 should drain freely. Drain plug torque: mid-20s Nm is generic Euro guidance - check service data, d...
3. **Replace Top Cartridge Filter - Replace the element with an OE-grade cartridge (correct** micron rating, anti-drainback) and replace the housing O-ring. Housing torque: mid-20s Nm is generic Euro guidance - check the service data.
4. **Reinstall Drain Plug (new washer!) - Reinstall the drain plug with a NEW crush washer.** Torque per the service data - the exact Giulia spec was not verified, so do not guess; the alloy pan strips if over-tightened. The crush washer is single-use: always replace it.
5. **Add 5.5 Quarts of 0W-30 - Add 5.5 quarts (5.2L) of 0W-30 ACEA C2 / 9.55535-GS1 through** the filler cap. Verify the oil meets 9.55535-GS1 on the product data sheet - 'Euro' branding alone isn't enough. Do NOT use the Quadrifoglio's 0W-40. Check the dipstick after f...
6. **Check Leaks, Scanner Reset - Start the engine - check for leaks. Reset the oil-life** counter with AlfaOBD or an FCA-capable scanner - the dash-only method sometimes doesn't fully reset. Interval: 6,000 miles / 12 months. This guide is the 2.0T - the Quadrifoglio'...
