2016 Scion iM - Brake Pad Replacement

2016 Scion iM | Advanced | 1-3 hours | $205 DIY

TOOLS

Floor jack, rated jack stands, and wheel chocks Lug wrench and calibrated torque wrench Brake piston compressor or suitable spreader Socket set, wire brush, brake cleaner, gloves, and eye protection

PARTS

Front or rear brake pad set for 2016-2016 Scion iM; verify axle, brake package, and VIN fitment $180.00

Replacement pad hardware or wear sensor only if the kit requires it $25.00

STEPS

1. **Confirm the front brake setup - Buy front-axle pads only - rears differ. Before ordering,** check friction material through the caliper window and feel the rotor face: a deep edge lip or grooves means replace the rotor too.
2. **Lift and secure the iM - Park on level ground, chock the rear wheels, and set the parking** brake - it acts on the rear wheels, so it will not fight the front brake job. Break the front lug nuts loose with the car still on the ground, then raise the front and set it...
3. **Remove the caliper and old pads - Pull the guide pins, slide the caliper off, and hang it** from the strut with wire - never by the hose. Retract the piston with a C-clamp, watching the reservoir so fluid doesn't overflow. Inspect the pin boots and piston dust seal for tea...
4. **Prep the hardware and retract the piston - Wire-brush the bracket's pad slide points and** lay a thin film of brake grease where the pad ears ride. Re-grease the slide pins with silicone brake grease and work them in and out of their boots - they should glide by hand. Set the old inn...
5. **Install pads, torque, pump, and bed in - Fit the new shims and pads into the bracket with** the pad ears seated in the greased support plates, swing the caliper back down, and reinstall the slide-pin bolts, tightening to the spec in your owner's manual or service info. Refit the wh...
