2014-2020 BMW 4 Series - Wiper Blade Replacement

2014-2020 BMW 4 Series | Easy | 10-15 minutes | $66 DIY

TOOLS
Microfiber cloth

PARTS
Driver wiper blade, 24" Bosch 24A $32.99
Passenger wiper blade, 18" Bosch 18B $32.99

STEPS

1. **Confirm the sizes - This holds for the F36 Gran Coupe and F33 convertible too - all use** the same 24/18 pair. There is no rear wiper on any 4 Series, so two blades finish the job.
2. **Put the wipers in service position - Like the F30, the 4 Series parks its wipers under** the hood lip. Start the car, switch it off, then press the wiper stalk down and hold it until the blades sweep up and stop vertical.
3. **Release the old driver-side blade - Fold the driver-side arm up until it holds. Pull the** 24-inch blade free and set it aside for comparison. Hold the bare arm firmly the whole time - never let it snap back onto the windshield.
4. **Prep the new driver-side blade - Remove the plastic protector from the new 24-inch** blade's rubber edge and keep your fingers off the rubber. Confirm the pinch-tab adapter is fitted in the blade's center socket before you lift it into place.
5. **Snap the new blade on and confirm the lock - Tug the blade firmly - it should not move at** all. Lower the arm back onto the windshield gently, guiding it down by hand than letting it drop.
6. **Repeat on the passenger side - Do the same pinch-tab release and install for the 18-inch** passenger blade. Verify the 24-inch blade is on the driver side before you call it done. The 4 Series coupe has no rear wiper, so both fronts complete the replacement.
7. **Exit service position and test with washer fluid - Start the car and tap the wiper stalk** down once to return the blades to their normal park. A chattering blade almost always means the pinch tabs did not fully click - pop it off and re-seat it before you drive in rain.
