2017-2024 Audi A4 - Replace Fog Light Bulb

2017-2024 Audi A4 | Moderate | 30 minutes | $15 DIY

TOOLS

T25 Torx screwdriver Flathead screwdriver Socket wrench set Extension bar Gloves Safety glasses Flashlight Trim removal tool Jack stands Wheel chocks

PARTS

H11 Halogen Fog Light Bulb H11LLB1 $15.00
H11 LED Fog Light Bulb H11LED1 $30.00

STEPS

1. **Position the 2017-2024 Audi A4 Premium and locate fog-light access - Park the 2017-2024** Audi A4 Premium on level ground, set the parking brake, and switch fog lights off. Access is often through a wheel-liner flap, under-tray opening, or by removing the fog-light bezel. Wear gloves - oils from skin shorte...
2. **Remove the fog-light cover or assembly as needed - Turn the plastic access cover** counterclockwise or unclip it. On some 2017-2024 Audi A4 Premium models you must unbolt the fog-lamp housing from the bumper to reach the bulb.
3. **Disconnect the connector and release the bulb - Unplug the electrical connector. Release** the wire retainer clip or twist the bulb socket counterclockwise per the 2017-2024 Audi A4 Premium design. Pull the old bulb straight out - do not force a stuck bulb sideways.
4. **Install the new bulb without touching the glass - Compare base type (H8/H11/LED module,** etc.) to the old bulb. Seat the new bulb fully in the 2017-2024 Audi A4 Premium housing and re-secure the retainer or twist-lock.
5. **Reconnect and test before final reassembly - Plug the connector back in until it clicks.** Switch on the ignition and fog lights to confirm both sides work on the 2017-2024 Audi A4 Premium. Aim should look level; adjust only if the housing was moved.
6. **Reinstall covers and liners - Refit the access cover, housing bolts, and wheel** liner/under-tray fasteners. Confirm no loose liner near the 2017-2024 Audi A4 Premium tire. Recheck fog-light operation one final time.
