2008-2017 Buick Enclave - Wiper Blade Replacement

2008-2017 Buick Enclave | Easy | 15-20 minutes | $81 DIY

TOOLS

Flathead Screwdriver 15mm Socket
Ratchet Wrench Rust Penetrant Gloves

PARTS

Driver wiper blade, 24" Bosch 24A $32.99
Passenger wiper blade, 21" Bosch 21B $32.99
Rear wiper blade, 12" $14.99

STEPS

1. **Service position (if needed) - No special service mode - the arms lift off the glass by** hand where they park. If an arm sits close to the hood edge, switch the ignition off while the wipers are mid-sweep to leave them raised, then lift each arm carefully.
2. **Lift the wiper arm - Raise one arm until it stays up and lay a folded towel beneath it -** a bare spring-loaded arm snapping back can crack the glass. Work one side at a time so the other blade stays on as a reference.
3. **Release the old blade - Pinch-tab style front arms: squeeze the two tabs on the blade** connector and slide the blade off. Note the connector's orientation for reassembly. Pull straight along the arm - never twist sideways, which bends the arm.
4. **Match the new blade - 24-inch driver, 21-inch passenger, 12-inch rear. Caution: some** catalogs list a 26-inch driver blade for 2012+ models, so measure your old blade if yours is 2012 or newer. Confirm the pinch-tab connector matches and attach any included adap...
5. **Install until it clicks - Slide the new blade onto the arm until the pinch tabs click,** then tug firmly to confirm it's locked. Fit the 24-inch driver, 21-inch passenger, and 12-inch rear blades. Verify each lies flat with the squeegee facing the glass.
6. **Lower and repeat - Lower each arm gently onto the glass, repeat for the other side and** the rear, then top off the washer fluid and run front and rear wash cycles. The sweep should be quiet and streak-free.
