2019-2024 Audi Q3 - Replace Wiper Blades

2019-2024 Audi Q3 | Easy | 15 minutes | $66 DIY

TOOLS

Flathead Screwdriver Phillips Head Screwdriver Socket Wrench Set Rubber Mallet Gloves

PARTS

Driver wiper blade, 24" Bosch 24A $32.99
Passenger wiper blade, 20" Bosch 20B $32.99
Rear wiper blade, 15" (2019-2020)
Rear wiper blade, 12" (2021-2024)

STEPS

1. **Service position (if needed) - The 2019-2024 Q3 needs service position - they park tucked** under the hood edge. Ignition on, then off, pull the wiper stalk down within about 10 seconds to park the arms upright. Never force the arms up from parked.
2. **Lift the wiper arm - With the arms in service position, lift one arm off the glass until** it stays up and slide a folded towel underneath. Never let a bare spring-loaded arm snap back onto the windshield. Work one side at a time.
3. **Release the old blade - The Q3 uses a slim push-button connector: press the release** button and slide the blade off. Note the orientation - the replacement goes back the same way. Pull straight along the arm; never twist sideways.
4. **Match the new blade - The 2019-2024 Q3 takes a 24-inch driver-side and 20-inch** passenger-side blade with the slim push-button connector. The rear blade is 15 inches (2019-2020) or 12 inches (2021-2024) - measure first. Confirm the correct adapter and match th...
5. **Install until it clicks - Slide the new blade on until the push-button clicks, then tug** gently to confirm it's locked. The 24-inch blade goes driver side, the 20-inch passenger side. Check each blade lies flat with the rubber edge facing the glass.
6. **Lower and repeat - Lower each arm onto the glass, repeat on the other side, and fit the** rear blade. Exit service position and run both wash cycles. If a new blade streaks, clean the windshield thoroughly - glass contamination is the usual cause.
