2008-2023 Audi TT - Wiper Blade Replacement

2008-2023 Audi TT | Easy | 10-15 minutes | $66 DIY

TOOLS
Tape measure (to confirm the passenger length on 2015+ cars) Microfiber cloth

PARTS
Driver wiper blade, 24" Bosch 24A $32.99
Passenger wiper blade, 21" Bosch 21B $32.99

STEPS

1. **Confirm your sizes by model year - they changed in 2015 - The 2008-2023 Audi TT changed** wiper sizes mid-run, so confirm your model year before buying. The TT coupe has no rear wiper. The arms use an Audi pinch-tab/top-lock connector.
2. **Move the wipers to the service position - Switch the ignition on, then switch it off, and** immediately push the wiper stalk down once - the arms will sweep up and stop where you can reach them. Never force the arms up from the parked position; you will scratch the hood paint or b...
3. **Release the old driver-side blade (pinch tab) - The TT uses a pinch-tab style connector** on its wiper arms. Slide the old blade down off the arm while holding the arm firmly with your other hand - never let a bare arm snap back.
4. **Prep the new driver-side blade - Take the new driver-side blade out of its sleeve and** strip the protective cap off the rubber edge without touching the rubber. Check that the pinch-tab adapter on the new blade matches the TT's arm - a generic hook adapter will not seat.
5. **Slide the new blade on and check the lock - Slide the new blade up onto the arm until the** pinch tabs click into place. Pull firmly on the blade to confirm the lock - it should not slide on the arm.
6. **Install the passenger-side blade - Do the passenger side the same way with the 21-inch** blade (or the length you measured on 2015+ cars). Double-check the longer blade is on the driver side before you call it done.
7. **Exit service position and test with washer fluid - Switch the ignition on and spray** washer fluid - one wipe cycle also returns the arms from the service position to their normal park. Re-seat any blade that misbehaves before driving in the rain.
