# 2017-2024 Cadillac XT5 - Cabin Air Filter

**2017-2024 Cadillac XT5 | Easy | About 10-15 minutes | $26 DIY**

**TOOLS**

None required (damper and access panel release by hand)  Small flathead screwdriver (optional, to help release a stubborn access-panel tab)

**PARTS**

ACDelco CF184 Cabin Air Filter CF184 $25.99
ACDelco CF184C Cabin Air Filter CF184C $27.99

## STEPS

1. **Move the seat and open the glove box - Slide the front passenger seat all the way back so** you have room to kneel at the glove box. Open the glove box and empty it completely - even a heavy owner's manual can crack the soft-open damper if the box drops with weight still in it.
2. **Release the glove box damper - Unhook the damper from its pin on the box so the glove box** can swing down past its normal travel. The arm simply slides off its mounting post by hand - do not pry it with a tool.
3. **Lower the glove box - Press the sides of the glove box inward to clear the travel stops** and swing the box all the way down. The XT5 hides the filter behind this panel rather than directly in the open.
4. **Remove the access panel - Release the retention tabs on the access panel and pull it away** from the housing. Set it aside on the passenger seat.
5. **Slide out the old filter - Pull the old filter straight out toward you, keeping it level** so trapped leaves and dust do not spill into the housing. Compare its size to the new filter before unwrapping the new one - a wrong-size filter will leave a gap at the edge t...
6. **Install the new filter - Slide the new filter into the slot with the airflow arrow** pointing in the same direction as the original. Push it fully home until the frame sits flush with the housing edge.
7. **Reassemble the glove box - Lift the glove box past the stops, reattach the damper arm,** and close the box.
