2015-2019 BMW X4 - Wiper Blade Replacement

2015-2019 BMW X4 | Easy | 15 minutes | $81 DIY

TOOLS
Microfiber cloth

PARTS
Driver wiper blade, 26" Bosch 26A $32.99
Passenger wiper blade, 20" Bosch 20B $32.99
Rear wiper blade, 12" $14.99

STEPS

1. **Confirm the sizes and buy the blades - The arm connector changed between generations:** 2015-2018 F26 models use a BMW side-pin-style clip, while the 2019 G02 uses a 15mm push-button clip - confirm which is on your car before buying.
2. **Move the wipers to the service position - Switch the ignition off, then push the wiper** stalk down and hold it for about three seconds - the arms should sweep up to a vertical service position.
3. **Release the old driver-side blade - Fold the driver-side arm up until it holds. On** 2015-2018 models, release the side-pin-style clip on the blade's center adapter; on the 2019 G02, press the 15mm push-button catch - either way, the blade then slides off the arm. Keep one...
4. **Prep the new 26-inch blade - Pull the protective sleeve off the new blade and do not** touch the rubber wiping edge. Compare the new blade against the old 26-inch one to confirm the length before mounting.
5. **Slide the new blade on and lock it - Slide the new 26-inch blade into the arm's connector** until the clip or button clicks into place. If it slides, the connector did not catch; pull it off and reseat it until the click is solid.
6. **Do the passenger side and the rear blade - Repeat the release and install for the 20-inch** passenger blade, keeping the 26 and 20 on their correct sides. Then lift the rear arm off the back glass, study how the old rear blade's connector releases, and swap in the new rear blade the...
7. **Exit service position and test - Switch the ignition on and run the wipers once - the** arms will return to their normal parked position. Run the rear washer and wiper and confirm the rear blade clears its arc cleanly.
