2007-2017 Ford Expedition | Easy | 15-20 minutes | $81 DIY

TOOLS

Microfiber cloth Glass cleaner Folded bath towel (arm cushion)

PARTS

Driver wiper blade, 22" Bosch 22A $32.99
Passenger wiper blade, 22" Bosch 22B $32.99
Rear wiper blade, 16" $14.99

STEPS

1. **Confirm sizes - your year range spans a generation split - The 2007-2017 Expedition range** covers two generations with different blade sizes, so confirm your model year first. The 2007 (late second generation) takes 20 inches on both front sides and a 17-inch rear blade - parts catalogs for the...
2. **Park and prep the vehicle - Park the Expedition on flat ground, switch the ignition off,** and take the key with you. Lay a folded towel across the base of the windshield as a cushion, since these arms are long and springy.
3. **Release the old driver-side blade - Lift the driver-side arm away from the glass until it** stands upright. At the top of the arm is the J-hook - rotate the blade 90 degrees so it sits perpendicular to the arm, then slide it downward out of the hook’s opening. On a truck thi...
4. **Prep the new driver-side blade - Open the new blade’s packaging and peel away the plastic** shipping guard on the rubber edge - the single most common cause of streaks on a brand-new install. Confirm you have the correct driver length for your year: 22 inches for 2008-2...
5. **Install the new driver-side blade and check the lock - With the blade held perpendicular** to the arm, thread its center connector into the J-hook and rotate it back parallel, then slide it up until it clicks into the locked notch. Pull along the arm to make sure it’s captured, then pivot it sli...
6. **Passenger side and rear blade - The passenger blade is the same length as the driver** blade on every Expedition in this range, and it installs exactly the same way. For the rear blade, lift the short arm on the liftgate. On the 2007, the rear is a 17-inch hook blade - r...
7. **Test with washer fluid - Start the Expedition, run the front washers, and let the wipers** sweep at least five full cycles at both low and high speed, then run the rear washer for the back blade.
