2007-2014 Honda Fit - Wiper Blade Replacement

2007-2014 Honda Fit | Easy | 10-20 minutes | $81 DIY

TOOLS

Soft towel to protect the glass Small flat screwdriver only if the adapter requires it Gloves and a clean cloth

PARTS

Driver wiper blade, 28" Bosch 28A $32.99
Passenger wiper blade, 14" Bosch 14B $32.99
Rear wiper blade, 14" $14.99

STEPS

1. **Get the right blades: 28"/14" (2009-2014) or 24"/16" (2007-2008) - 2009-2014: 28-inch** driver, 14-inch passenger, 14-inch rear. 2007-2008: 24-inch driver, 14- to 16-inch passenger, 14-inch rear. All J-hook arms. Double-check box labels - the driver blade is nearly twice the passenger’s length.
2. **Protect the glass - Raise each arm one at a time, with a folded towel under it on the** glass. Never let a bare arm snap back onto the windshield - the spring tension is enough to chip it. Give the short, light rear arm the same care.
3. **Remove the old blade - Press the locking tab and slide the blade out, working straight** along the arm - don’t bend it sideways. The rear blade pops off its rocker-style arm the same way: press the tab and slide it free.
4. **Install and lock the new blade - Click each blade into the J-hook until the tab seats,** then tug to confirm it’s locked. Driver side: 28-inch (24-inch on 2007-2008). Passenger: the shorter one. Rear arm: 14-inch. Check each blade lies flat, squeegee edge to glass.
5. **Test with washer fluid - Lower all arms gently, top up the washer fluid, and run the** front washers plus a rear wash cycle. Every sweep should be quiet and streak-free. If the wipe looks uneven, clean the glass and recheck before blaming the new blades.
