2019-2024 Honda Passport - Cabin Air Filter

2019-2024 Honda Passport | Easy | 15-25 minutes | $20 DIY

TOOLS

Trim tool or flat screwdriver (optional) Flashlight Gloves Vacuum or rag for debris

PARTS

Cabin air filter $20.00

STEPS

1. **Park the Passport and clear the glovebox - Park on level ground, ignition off, parking** brake set. The filter lives behind the glovebox - open the passenger door, slide the seat back, and empty the glovebox. The OE-style filter is Honda 80292-SDA-A01; confirm against your owner's...
2. **Release the glovebox stoppers - Remove the stoppers on both sides so the glovebox hangs** freely on its hinges - let it drop gently. If a stopper resists, wiggle it straight out; prying sideways snaps the little tabs.
3. **Open the filter cover from the bottom - Unlatch the cover starting at the bottom - its** top edge hooks into the housing, so bottom-first lets it swing free without stressing the hooks. Note the old filter's airflow arrow before pulling it; a quick photo prevents the most common...
4. **Swap in the new filter - Compare old and new filters to confirm size. Vacuum the empty** housing if dirty, then slide the new filter in with its arrow matching the old - flat and fully seated, no curled edges. Go slowly and watch the leading edge; that's where fil...
5. **Reassemble and test - Refit the filter cover until it latches top and bottom, lift the** glovebox back, and re-engage both stoppers. Start up and cycle the fan through every speed on fresh air - airflow should be strong and even, with no whistling or stale odor.
