# 2021-2024 Cadillac Escalade - Engine Air Filter

**2021-2024 Cadillac Escalade | Easy | 10-20 minutes | $20 DIY**

**TOOLS**
Screwdriver or socket (if housing uses screws) Rag or shop vacuum Gloves

**PARTS**
Engine air filter $20.00

## STEPS

1. **Prep and locate the air box - Park level, set the brake, and shut the engine off. Open** the hood and find the sealed airbox upstream of the intake ducting - a large black box, easy to spot. The Escalade's 6.2L V8 uses the T1 shared filter - GM 84121217, same as Yuko...
2. **Open the air filter housing - Check yours: the lid uses clips or screws (a screwdriver is** typically needed per K&N; 5-10 minutes). Lift the lid only as far as needed, keeping it tethered if possible so it doesn't strain the intake tube. Note the lid orientation for rei...
3. **Remove the old filter and clean - Lift the old filter out. The correct filter is: GM** 84121217; ACDelco A3244C; FRAM CA12404 (12.6" x 9.65" x 2.40"). Hold the old element up to light - no light through the pleats means it was overdue. Wipe the airbox interior with a clean...
4. **Install the new filter - Seat the new filter (GM 84121217; ACDelco A3244C; FRAM CA12404** (12.6" x 9.65" x 2.40")) with its rubber seal fully seated in the groove, pleats facing the same direction as the old filter. Run your finger around the entire perimeter - th...
5. **Reseal and verify - Close the airbox lid evenly - press down uniformly so the seal** compresses equally - and refasten every clip or screw. Double-check the intake tube clamps are snug. Start the engine and listen for 30 seconds: whistling or hissing means...
