2023-2024 Kia Niro EV - Cabin Air Filter

2023-2024 Kia Niro EV | Easy | 10-15 minutes | $28 DIY

TOOLS
No tools required Flashlight Microfiber cloth

PARTS
Cabin air filter for 2023-2024 Kia Niro EV; verify arrows, size, and VIN/trim fitment
$28.00

STEPS

1. **Prep: second-gen Niro EV, behind the glove box - The second-generation Niro EV (body code** SG2) keeps its cabin air filter behind the glove box - no under-hood work. Park on level ground, power down, slide the passenger seat back, and empty the glove box fully.
2. **Detach the damper arm from its post - Unclip the damper arm from its post on the open** glove box by hand, using straight outward pressure - no tools needed. Don't twist it sideways; the plastic post is the weak point and will snap.
3. **Drop the box past the stoppers - Squeeze both inner sides of the glove box past the** plastic stoppers and let it swing down. Twist-out stoppers get a quarter-turn instead - don't force the box. The filter housing cover is now exposed.
4. **Open the filter cover from both sides - Squeeze the tabs on both sides of the filter** cover and pull it toward you - no tools needed. Set the cover on the passenger seat, and photograph the old filter's face: the airflow arrow guides the new filter's orientation.
5. **Swap in the new filter, arrow down - Slide the old filter out by its frame, wiggling** gently if it sticks - note the dirty intake side. Vacuum the slot, then install the new filter with its arrow pointing down toward the blower, pushed flush.
6. **Put the cover, stops, and damper back - Press the cover back until both tabs click. Swing** the glove box up until stoppers snap behind the walls, then reconnect the damper arm. Open and close the box twice: travel with a firm stop means it's seated; over-travel means a stopper mi...
7. **Verify airflow through every vent - Power on and run the HVAC at full speed through the** dash vents, floor, and defrost. Airflow should be strong and even with no whistling or rattling. Inspect the filter yearly and replace it when it looks dirty - sooner in dusty condition...
