2004-2011 Chevrolet Aveo - Wiper Blade Replacement

2004-2011 Chevrolet Aveo | Easy | 10-20 minutes | $81 DIY

TOOLS

Soft towel to protect the glass Small flat screwdriver only if the adapter requires it Gloves and a clean cloth

PARTS

Driver wiper blade, 22" Bosch 22A $32.99
Passenger wiper blade, 19" Bosch 19B $32.99
Rear wiper blade, 15" $14.99

STEPS

1. **Get the right blades: 22" driver, 18" or 19" passenger (by year) - Aveo wiper sizes vary** slightly by year. Some hatchbacks also have a 15-inch rear wiper - check your back glass. Measure the old passenger blade before ordering, since the one-inch difference between model years is easy to get wrong.
2. **Protect the glass - Raise one Aveo wiper arm at a time and place a folded towel on the** windshield under it. Never let a bare spring-loaded arm snap onto the glass - the spring tension can chip it.
3. **Remove the old blade - Pull in line with the arm and avoid twisting sideways, which can** bend the arm. Lay the old blade next to the new one to double-check the length matches before it goes on.
4. **Install and lock the new blade - Click the new blade into the J-hook until the tab seats,** then tug lightly to confirm it is locked. Verify each blade lies flat with the rubber squeegee facing the glass correctly.
5. **Test with washer fluid - Lower the arms gently onto the windshield, top off the washer** fluid, and run a wash cycle. The sweep should be quiet and streak-free across the full arc.
