2019-2024 Lexus UX - Engine Oil & Filter Change

2019-2024 Lexus UX | Moderate | 30-60 minutes | $57 DIY

TOOLS

Floor jack or ramps and rated jack stands if needed Oil-drain pan, funnel, gloves, and eye protection Socket or wrench for the drain plug and oil-filter tool
Calibrated torque wrench and shop towels
14mm Socket 10mm Socket

PARTS

Engine Oil (0W-16) $45.00
Correct engine oil filter and drain-plug washer for 2019-2024 Lexus UX 200 $12.00

STEPS

1. **Confirm oil specification and make the vehicle safe - 2.0L M20A-FKS takes 4.9 quarts** (4.6L) of 0W-16 with filter; 0W-20 only if 0W-16 is unavailable, then switch back next change. Spin-on Toyota 90915-YZZN1 from underneath. Park level, brake set, wheels chocked; raise front on ramps or jack s...
2. **Warm briefly and protect the work area - Warm briefly, shut off, pull fill cap, pan under** sump. NEW drain plug gasket (90430-12031) every change; 14mm socket for plug. Remove under-engine cover (10mm bolts in tray); filter is on front of sump - pan under both.
3. **Drain the used oil and replace the filter - Drain via the 14mm plug; reinstall with the** new gasket, OE plug only, torqued to 30 ft-lbs. Spin off the old filter, wipe the surface, confirm the old gasket came off. Oil the new gasket; hand-tighten plus the box-stated turn.
4. **Install the correct oil quantity - Add 0W-16 through a funnel - 4.9 quarts with the** filter - stopping short of full, then dipstick to the top line. Add the last half-quart slowly; this engine is overfill-sensitive. Refit the cap tightly.
5. **Check level, leaks, and service reminder - Start briefly, shut off, wait a few minutes,** recheck level on level ground. Inspect plug and filter for leaks. Reset the maintenance-required reminder through the cluster menu and confirm it reads cleared; record mileage and oil grade.
