2018-2024 Mitsubishi Eclipse Cross - Engine Air

2018-2024 Mitsubishi Eclipse Cross | Easy | 20-45 minutes | $35 DIY

TOOLS

Flat screwdriver or trim tool as fitted Metric/SAE socket set and ratchet Clean shop towels and a flashlight Gloves and safety glasses

PARTS

Engine air filter for 2018-2024 Mitsubishi Eclipse Cross; verify engine, housing shape, and VIN fitment $35.00

STEPS

1. **Confirm filter fitment and engine state - Park the 2018-2024 Mitsubishi Eclipse Cross on** level ground, switch the engine off, and let the bay cool - the 1.5L turbo four and its intake plumbing hold heat after a drive.
2. **Open the air box - Keep a clean towel over the intake opening while the housing is open.** The lid is held by metal spring clips around its edge; pop each clip outward with your fingers and lift the lid clear.
3. **Inspect the old filter and housing - Lift the old filter from the Eclipse Cross airbox** and note which face sat on top and which way the pleats faced - the dark, dust-loaded side shows the airflow direction. Hold it to daylight; if light barely passes through, it was overdue...
4. **Install the new filter - Clean the housing first, then drop the new filter into the lower** airbox in the same orientation as the old one, with its rubber gasket resting evenly on the sealing lip all the way around. The panel should seat flat without being forced ...
5. **Close and verify the intake - Lower the airbox lid squarely and pop every spring clip** back over its tab until it snaps, then tug the lid gently to confirm the Eclipse Cross airbox is sealed tight all around.
