2009-2017 Chevrolet Traverse | Easy | 20-45 minutes | $35 DIY

TOOLS

Flat screwdriver or trim tool as fitted
Clean shop towels and a flashlight Gloves and safety glasses

PARTS

Engine air filter for 2009-2017 Chevrolet Traverse; verify engine, housing shape, and VIN fitment $35.00

STEPS

1. **Prep and locate the air box - Park the 2009-2017 Chevrolet Traverse on level ground, set** the parking brake, and shut the engine off. Open the hood and locate the engine air filter housing: Black plastic air filter box near the front of the engine bay, connected to the...
2. **Open the air filter housing - On the 2009-2017 Chevrolet Traverse, SCREWS - GM air box** retainer screws hold the lid down (not tool-free clips; you'll need a screwdriver to remove them). Note the lid orientation for reinstall.
3. **Remove the old filter and clean - Lift the old engine air filter out of the housing. The** correct filter is: GM 15278634; FRAM CA10110; ACDelco equivalent. Inspect the old element - hold it up to light; if you can't see light through the pleats, it was overdue. Wipe the i...
4. **Install the new filter - Seat the new filter (GM 15278634; FRAM CA10110; ACDelco** equivalent) in the Chevrolet Traverse housing with the rubber seal fully seated in the groove. An unseated filter lets dirt directly into the 3.6L V6, causing premature engine wear.
5. **Reseal and verify - Close the air-box lid evenly - press down uniformly so the seal** compresses equally. Refasten every clip or screw. Double-check the intake tube clamps are snug. Take a short test drive. Interval: Every 15,000-30,000 miles or once a year.
