2018-2023 Chevrolet Traverse - Brake Pad

2018-2023 Chevrolet Traverse | Advanced | 1-3 hours | $205 DIY

TOOLS

Floor jack, rated jack stands, and wheel chocks Lug wrench and calibrated torque wrench Brake piston compressor or suitable spreader Socket set, wire brush, brake cleaner, gloves, and eye protection

PARTS

Front or rear brake pad set for 2018-2023 Chevrolet Traverse; verify axle, brake package, and VIN fitment $180.00
Replacement pad hardware or wear sensor only if the kit requires it $25.00

STEPS

1. **Confirm axle, parts, and brake condition - Confirm the front axle: dual-piston floating** calipers. Match pads with the wear indicator; measure rotor thickness vs the hat minimum. Forum-quoted torque - guide pins 53 ft-lb, bracket 111 ft-lb plus 15-30 - is unverified: confirm i...
2. **Lift and secure the vehicle - Loosen the lug nuts on the ground, lift one front corner** with a floor jack, and set it on a rated jack stand under the frame - never rely on the jack alone.
3. **Remove the caliper and old pads - Unbolt the caliper from the bracket and slide it off** the rotor, then hang it from the strut with a wire hook - never by the hose. Pull the old pads and note the wear-sensor tab position.
4. **Install pads and hardware - Wire-brush the bracket lands and install fresh stainless** abutment clips. Re-grease the slide pins with silicone brake grease, seat the boots fully, and slide the caliper back over the pads.
5. **Torque and refit the wheel - Torque the guide-pin bolts to 53 ft-lb and the bracket bolts** to the 111 ft-lb plus angle-turn procedure - confirm both figures in your Traverse service info before torquing - then refit the wheel and torque the lug nuts in a star pattern.
