# 2011-2024 Dodge Durango - Wiper Blade Replacement

**2011-2024 Dodge Durango | Easy | 15-20 minutes | $81 DIY**

**TOOLS**

Glass cleaner and a microfiber cloth  Tape measure (only if your old blades look different from the sizes below)

**PARTS**

Driver wiper blade, 22" Bosch 22A $32.99
Passenger wiper blade, 21" Bosch 21B $32.99
Rear wiper blade, 12" $14.99

## STEPS

1. **Confirm your sizes and buy the right blades - Every Durango from 2011 through 2024 - the** entire third generation, sold as the WD - uses the same wiper sizes: a 22-inch blade on the driver side, a 21-inch blade on the passenger side, and a 12-inch blade on the rear liftgate glass....
2. **Park and prep - Switch the ignition off with the front wipers parked at the base of the** windshield. Make sure the liftgate is fully closed and latched before you work on the rear wiper.
3. **Remove the old driver-side blade - Lift the driver-side arm off the windshield until the** hinge holds it. Press the tab and slide the blade downward, toward the arm's pivot, until the hook slips out of the saddle - the travel is only about an inch.
4. **Prepare the new 22-inch blade - Unbox the driver-side blade and peel off the plastic** guard on the rubber edge. Lay it alongside the old blade to confirm the 22-inch length - the 22 and 21 look almost identical, and swapping them is the single most common Durango wiper...
5. **Install the driver-side blade and check the lock - Steady the arm and slide the new** blade's saddle up over the J-hook until the release tab clicks positively into place. Guide the arm back down onto the windshield by hand - never release it from height and let the spring do the work.
6. **Replace the passenger blade and the rear blade - Fit the 21-inch blade to the passenger** arm with the same press-slide-click motion, and tug-test it. Then move to the liftgate: lift the short rear arm away from the glass and locate the release on its dedicated rear connector - it is a s...
7. **Test front and rear washers - Ignition on, all arms flat on the glass. Run the front** washers with a pull of the stalk and let the wipers sweep several times, checking for streaks, tip skipping, or chatter.
