# 2018-2024 Ford Expedition - Engine Air Filter

**2018-2024 Ford Expedition | Easy | 10-20 minutes | $20 DIY**

**TOOLS**

Screwdriver or socket (if housing uses screws) Rag or shop vacuum Gloves 8mm Socket

**PARTS**

Engine air filter $20.00

## STEPS

1. **Prep and locate the air box - Park, set the parking brake, and shut the engine off. The** air box sits on the driver's side of the bay. Correct filter: Motorcraft FA-1883 (replaced FA-1903 / AL3Z-9601-A). Grab an 8mm socket with an extension -- a couple of bolts sit in r...
2. **Open the air filter housing - Remove the four lid bolts with your 8mm socket and** extension, then lift the lid straight up and rest it somewhere clean. Set the bolts where they can't roll away. If the lid sticks, wiggle it gently rather than prying -- yanking at an angl...
3. **Remove the old filter and clean - Lift the old filter out and compare it with the new** Motorcraft FA-1883. Vacuum the box bottom and wipe the sealing lip, keeping debris out of the intake tube. Expeditions that tow or run dirt roads load filters fast -- check yearly. Ford:...
4. **Install the new filter - Seat the new filter, rubber seal fully in the groove, matching** the old orientation. Press it flat with no raised corners -- it should drop in without force. A pinched edge keeps the lid from sealing. The FA-1883 superseded FA-1903, so don'...
5. **Reseal and verify - Lower the lid, reinstall the four bolts, and snug them evenly in a** crisscross pattern so the lid seats without warping -- firm is enough in plastic. Finger-check the lid seal and snug the intake tube. Start the engine, idle a minute, and l...
