2011-2019 Ford Fiesta - Oil & Filter Change

2011-2019 Ford Fiesta | Moderate | 30-60 minutes | $57 DIY

TOOLS

Floor jack, rated jack stands or ramps, and wheel chocks Correct oil-filter wrench or cap tool Drain pan, funnel, gloves, and eye protection Calibrated torque wrench for the drain plug and filter housing when specified 13mm Socket

PARTS

Engine Oil (5W-20) $45.00
Engine oil filter for 2011-2019 Ford Fiesta; verify engine and VIN fitment $12.00
New drain-plug washer or O-ring when the service procedure requires it $3.00

STEPS

1. **Confirm oil and filter fitment - The 1.6L four-cylinder takes 4.2 quarts of 5W-20 meeting** Ford WSS-M2C930-A. Motorcraft FL-910-S spin-on filter, mounted horizontally at the front of the engine; 13mm drain plug. Have a filter wrench, 13mm socket, and funnel. Park level wit...
2. **Raise and secure the vehicle - Set the parking brake and chock the wheels. The Fiesta is** low, so drive onto ramps or lift the front at the pinch-weld points and set it on jack stands - never work under it on the jack alone.
3. **Drain the old oil - Remove the fill cap to vent the crankcase. Position the pan under the** oil pan, remove the 13mm plug, and drain fully. The plug tightens to about 21 ft-lbs on reinstall. Wipe the pan flange clean.
4. **Replace the filter - Unscrew horizontal FL-910-S at front - keep it level coming off; it** holds oil. Confirm gasket came off, wipe mount, oil gasket with fresh 5W-20, thread on by hand until seated, tighten per box. Reinstall plug to about 21 ft-lbs.
5. **Refill and check for leaks - Level car. Add ~4 quarts 5W-20, wait, check dipstick, top to** full mark - 4.2 quarts total. Run briefly, shut off, check filter, plug for leaks. Recheck after short drive. Reset oil-life monitor via cluster settings; recycle oil and filte...
