2016-2022 Honda Pilot - Replace Wiper Blades

2016-2022 Honda Pilot | Easy | 15 minutes | $81 DIY

TOOLS
No tools required

PARTS
Driver wiper blade, 26" Bosch 26A $32.99
Passenger wiper blade, 24" Bosch 24B $32.99
Rear wiper blade, 14" $14.99

STEPS

1. **Service position (if needed) - The 2016-2022 Honda Pilot (including the EX-L trim) needs** no special service position - the arms lift straight off the glass by hand.
2. **Lift the wiper arm - Raise one Pilot wiper arm until it stays up and lay a folded towel** on the windshield beneath it. Never let a bare spring-loaded arm snap onto the glass.
3. **Release the old blade - The Pilot uses J-hook (9x3) arms: press the release tab where the** blade meets the hook and slide the blade down out of the hook. Note the blade's orientation as it comes off.
4. **Match the new blade - The 2016-2022 Pilot takes a 26-inch driver-side blade, a 24-inch** passenger-side blade, and a 14-inch rear blade on J-hook arms - the same sizes on every trim including the EX-L. Because both front blades are long, double-check the box la...
5. **Install until it clicks - Thread the new blade's connector into the J-hook until it** clicks, then tug gently to confirm it is locked. The 26-inch blade goes on the driver side, the 24-inch on the passenger side.
6. **Lower and repeat - Lower the arm gently onto the windshield, repeat on the other side,** and fit the 14-inch rear blade on the back glass. Top off the washer fluid and run front and rear wash cycles.
