2016-2021 Hyundai Tucson - Battery Replacement

2016-2021 Hyundai Tucson | Easy | 30-90 minutes | $180 DIY

TOOLS

10 mm wrench or socket, ratchet, and short extension Battery terminal brush and electrical-safe cleaner Memory saver only if the vehicle procedure permits it Gloves, eye protection, and a small flashlight

PARTS

Replacement 12-volt battery for 2016-2021 Hyundai Tucson; verify group size, CCA, terminal layout, and VIN fitment $180.00 Anti-corrosion terminal protectant or felt washers (optional) $8.00

STEPS

1. **Verify battery fitment and charging symptoms - Confirm fitment before buying. Watch for** slow cranking, dim or flickering lights, a battery warning, or needing a jump more than once, and get a free battery and alternator test first - a weak charging system mimics a bad battery.
2. **Make the vehicle safe - Park level, shift to Park, set the parking brake, ignition fully** off. The 12-volt battery is under the hood, secured with a hold-down bracket. Wear gloves and safety glasses; remove metal jewelry.
3. **Disconnect the old battery - If a plastic cover or air-filter housing blocks access, move** it aside - check your layout before forcing anything. Loosen the negative (black) clamp first (typically 10 mm), twist it free, and tuck it safely away. Then remove the positiv...
4. **Seat the battery and reconnect - Seat it flat and refit the hold-down bracket snugly.** Reconnect positive first, then negative, tightening each clamp until it won’t twist on the post. Clean corrosion with a wire brush and apply dielectric grease.
5. **Reset and verify operation - Start and confirm strong cranking with no warning lights.** Take a 15-20 minute drive and confirm all electronics behave. Recheck terminal tightness and the hold-down after the drive. Return the old battery for the core refund - never pu...
