Calibrated torque wrench and shop towels
Oil Filter Cap Wrench

PARTS

Engine Oil (0W-20) $45.00
Correct engine oil filter and drain-plug washer for 2016-2024 Jaguar XE $12.00

STEPS

1. **Confirm oil specification and make the vehicle safe - Ingenium 2.0L: ~7.4 US quarts** 0W-20; cartridge LR073669 (Mann HU6024Z equivalent). Housing location wasn't verified - find it in your owner's manual first. Park level, brake set, chock wheels. Let the hot engine cool a few extra minutes...
2. **Warm briefly and protect the work area - Warm 2-3 minutes. Gather large drain pan,** funnel, cartridge cap wrench, gloves, new element with fresh O-rings. Raise on stands or ramps; remove blocking underbody panels. Jaguar panels mix fastener types - keep them sorted for reassem...
3. **Drain the used oil and replace the filter - Pull the plug; drain fully. Open the housing,** let it drain; fit the new LR073669 with fresh O-rings - check the old O-ring isn't stuck in the bore. Reseat the cap. Torque the plug - never by feel on aluminum.
4. **Install the correct oil quantity - Reinstall plug with a fresh seal; pour ~7.4 quarts** 0W-20 through a funnel, last quart slowly. Refit cap and panels. Fill in two stages and recheck - the Ingenium's long dipstick tube can read false-low right after pouring.
5. **Check level, leaks, and service reminder - Start, idle a minute; check housing and plug** for leaks. Off, wait several minutes, check level per the manual. Reset the service indicator; recycle oil and cartridge. Log mileage and date.
