2020-2024 Kia Telluride - Replace Wiper Blades

2020-2024 Kia Telluride | Easy | 15-20 minutes | $81 DIY

TOOLS

Flathead Screwdriver Phillips Head Screwdriver Socket Wrench 10mm Socket Pliers Rubber Gloves Safety Glasses Flashlight Ladder or Step Stool Towel or Cloth

PARTS

Driver wiper blade, 26" Bosch 26A $32.99
Passenger wiper blade, 18" Bosch 18B $32.99
Rear wiper blade, 12" $14.99

STEPS

1. **Service position (if needed) - The 2020-2024 Telluride needs no special service position** - the arms lift straight off the glass by hand. If an arm rests close to the hood edge, switch the ignition off mid-sweep to park them raised, then lift carefully.
2. **Lift the wiper arm - Raise one arm until it stays up and place a folded towel on the** glass beneath it. Never let a bare spring-loaded arm snap back onto the windshield. Work one side at a time.
3. **Release the old blade - The Telluride uses J-hook arms: press the release tab where the** blade meets the hook and slide the blade down and out. Pull in line with the arm - never twist sideways, which can bend the arm. Note the orientation.
4. **Match the new blade - The 2020-2024 Telluride takes a 26-inch driver-side blade, an** 18-inch passenger-side blade, and a 12-inch rear blade on J-hook arms - same on every trim. Hold each new blade against the old one to verify length.
5. **Install until it clicks - Feed the new blade’s connector into the J-hook until it clicks** home, then pull gently to confirm it’s locked. The 26-inch blade goes driver side, the 18-inch passenger side. Check each sits flat with the rubber edge the right way.
6. **Lower and repeat - Lower the arm gently onto the glass, repeat on the other side, and fit** the 12-inch rear blade. Top off the washer fluid and run front and rear wash cycles - every sweep should be quiet and streak-free.
