# 2025-2026 Nissan Ariya - Wiper Blade Replacement

2025-2026 Nissan Ariya | Easy | 15-20 minutes | $81 DIY

**TOOLS**

Clean microfiber cloth  Glass cleaner
Folded towel (to protect the windshield while blades are off)

**PARTS**

Driver wiper blade, 26" Bosch 26A $32.99
Passenger wiper blade, 18" Bosch 18B $32.99
Rear wiper blade, 16" $14.99

## STEPS

1. **Confirm the blade sizes and buy the new blades - The Ariya takes a 26-inch driver blade,** an 18-inch passenger blade, and a 16-inch rear blade. (Outside the US, passenger blades may be 19 inches - measure yours.) Buy the rear blade made specifically for the Ariya - its connector diffe...
2. **Move the wipers to the service position - The Ariya's wipers park tucked under the hood** line - move them to a service position first. Switch the vehicle on, turn the wipers on, then power off when the blades are halfway up the glass. Only then lift each arm away from the windshi...
3. **Remove the old driver-side blade (large J-hook) - Lift the driver-side arm off the glass.** The front arms use a large J-hook (9x4) connector - press the tab or button where the blade meets the hook, then slide the old blade down and out. Set it aside to compare with the new blade.
4. **Prep the new driver-side blade - Hold the new 26-inch blade next to the old one to** confirm the length matches. Keep the edge guard on the new blade until it locks onto the arm, and verify the J-hook adapter on the new blade is the correct type before mounting it.
5. **Install the new driver-side blade and check the lock - Thread the arm's J-hook through** the new blade's adapter and slide the blade up until it clicks. Tug it - it must not slide or wobble in the hook. Lower the arm gently back onto the windshield; never let it snap down on its own.
6. **Do the passenger side and the rear blade - Repeat on the passenger side with the 18-inch** blade. For the rear, study how the old 16-inch blade attaches first - its connector differs from the fronts. Press the release, slide it off, and fit the new blade until it locks.
7. **Test with washer fluid and inspect the wipe - Power the Ariya on, spray washer fluid, and** run the front wipers at low and high speed - no streaks, skips, or chatter allowed. Then run the rear wiper with washer fluid and confirm the 16-inch blade clears the hatch glass evenly end to...
