2015-2024 Nissan Murano - Brake Pad Replacement

2015-2024 Nissan Murano | Advanced | 1-3 hours | $205 DIY

TOOLS

Floor jack, rated jack stands, and wheel chocks Lug wrench and calibrated torque wrench Brake piston compressor or suitable spreader Socket set, wire brush, brake cleaner, gloves, and eye protection

PARTS

Front or rear brake pad set for 2015-2024 Nissan Murano; verify axle, brake package, and VIN fitment $180.00

Replacement pad hardware or wear sensor only if the kit requires it $25.00

STEPS

1. **Confirm axle, parts, and brake condition - One useful check: the front pads for this car** are cataloged as not prepared for an electronic wear sensor, so don’t go hunting for a sensor wire that isn’t there - verify visually on your car, since some owners retrofit them.
2. **Lift and secure the vehicle - Park on level ground, set the parking brake, and chock the** rear wheels. Jack the front at the subframe or reinforced pinch-weld points and lower it onto jack stands - never work under a jack-only vehicle.
3. **Remove the pads, shims, and retainers - Remove the pads, shims, and pad retainers from** the torque member, laying them out in order - note which shim is inner vs outer and how the retainers sit. Inspect the sliding pins and boots for tears or corrosion.
4. **Clean the guide pins and retract the pistons - Pull the sliding pins, clean them and** their boots, and coat with fresh high-temperature silicone brake grease so the floating caliper self-centers. Retract both pistons evenly with a dual-piston compressor, and watch the reservoir level as...
5. **Torque and pump - Pump the brake pedal until firm before driving. Reinstall the wheel and** torque the lug nuts in a star pattern to 108 Nm (80 ft-lb), Nissan’s standard.
