2010-2015 Nissan Titan - Engine Oil & Filter Change

2010-2015 Nissan Titan | Moderate | 30-60 minutes | $57 DIY

TOOLS

Floor jack or ramps and rated jack stands if needed Oil-drain pan, funnel, gloves, and eye protection Socket or wrench for the drain plug and oil-filter tool Calibrated torque wrench and shop towels

PARTS

Engine Oil (5W-30) $45.00
Correct engine oil filter and drain-plug washer for 2010-2015 Nissan Titan $12.00

STEPS

1. **Confirm oil specification and make the vehicle safe - Confirm engine, viscosity, and** capacity. The 5.6L VK56DE V8 takes 6.5 quarts (6.2L) of 5W-30 - the 2016-and-up engine has a different fill. Small spin-on filter; pull the front undercover first. Park level, brake set, front on ramps or s...
2. **Warm briefly and protect the work area - Warm the engine, then shut it off. Remove the** fill cap and set drain pan. Pull the front undercover and tray the fasteners. Have a new drain-plug washer and a cap-style wrench ready - the factory filter is extremely tight.
3. **Drain the used oil and replace the filter - Pull plug and drain. Refit with a new washer** at 25 ft-lbs (34.3 N-m). Spin off the old filter, wipe the surface, and confirm the old gasket came off. Oil the new gasket and install hand-tight plus the box’s turn.
4. **Install the correct oil quantity - Funnel in 6.5 quarts of 5W-30, stopping short of full,** then top up to the top line. Wait a full five minutes after the last pour before trusting the dipstick - the big sump drains slowly down the tube.
5. **Check level, leaks, and service reminder - Start the engine briefly, shut it off, wait a** few minutes, then recheck the level on level ground. Inspect the plug and filter for leaks. Refit the front undercover, reset the maintenance reminder, and record the mileage and oil grade.
