2019-2024 Volkswagen Jetta - Cabin Air Filter

2019-2024 Volkswagen Jetta | Easy | 15-25 minutes | $20 DIY

TOOLS

Plastic trim tool Small screwdriver (if required by the filter cover) Gloves Shop vacuum or clean rag

PARTS

Cabin air filter $20.00

STEPS

1. **Prepare the vehicle and locate the filter - Park level, ignition off, and open the** passenger door for light and room. The Jetta’s pollen filter sits behind the glovebox on the HVAC housing - a quick glovebox-drop job. Empty the glovebox and confirm the new filter’s size and frame...
2. **Open the glovebox access - Press both sides of the open glovebox inward near the top so** the stops clear their tracks, and let the box swing down past its normal position on its lower hinges. Unhook the right-side dampener cord if it blocks the drop - if the cord p...
3. **Remove the old cabin filter - Squeeze the housing door’s two tabs and swing it open, then** slide the old filter out - noting the airflow arrow points down toward the blower on this platform. Inspect the element for leaves, dust, moisture, or mold; a musty filter is th...
4. **Clean and install the new filter - Vacuum the filter slot without pushing debris into the** blower wheel - a flashlight helps. Slide the new filter in with its airflow arrow pointing down, fully home so the frame sits flat with no buckled pleats or edge gaps that let unfilt...
5. **Reassemble and test HVAC operation - Clip the filter door shut, swing the glovebox past** its stops, and re-hook the right-side dampener cord. Run the blower through every speed on fresh air - airflow should be strong and even with no rattles or whistling. If the glovebox los...
