2018-2024 Volvo XC60 - Brake Pad Replacement

2018-2024 Volvo XC60 | Advanced | 1-3 hours | $205 DIY

TOOLS

Floor jack, rated jack stands, and wheel chocks Lug wrench and calibrated torque wrench Brake piston compressor or suitable spreader Socket set, wire brush, brake cleaner, gloves, and eye protection

PARTS

Front or rear brake pad set for 2018-2024 Volvo XC60; verify axle, brake package, and VIN fitment $180.00

Replacement pad hardware or wear sensor only if the kit requires it $25.00

STEPS

1. **Confirm axle, parts, and brake condition - Confirm the FRONT axle - single-piston** floating calipers on vented rotors. Buy front pads for your exact trim, plus pad hardware, a retaining spring clip, brake cleaner, and silicone brake grease. Match new pads to the old ones before or...
2. **Lift and secure the vehicle - Chock the rear wheels and set the parking brake. Break the** front lug nuts loose on the ground, jack at the factory jacking points, and set the front on rated jack stands - never under a jack alone. Remove the wheel.
3. **Remove the caliper and old pads - Pop the retaining spring clip off the caliper face,** remove the two slider pins, and lift the caliper off. Hang it from the strut - never by the hose. Pull the pads and inspect the rotor, pins, boots, and piston dust seal for damage.
4. **Install pads and hardware - Clean and re-grease the slider pins, seat the pads, and refit** the caliper. Torque the pins and snap the retaining clip home. Retract the piston with steady pressure through an old pad; keep grease off the friction faces and rotor.
5. **Torque and pump - Torque pins, bracket, and wheel fasteners to Volvo specs. Lower the** vehicle and tighten the lug nuts in a star pattern on the ground. Pump the pedal until it goes firm, then check the reservoir level and top up with the correct DOT fluid.
